📖 Introduction & Overview

Welcome to **SeedBetArt Ai Bot**, a powerful WordPress plugin designed to provide professional-grade betting analysis and AI-powered recommendations for football matches.

✨ Key Features

- **Value Bets:** Identifies matches with positive expected value (EV)
- **Lay The Draw (LTD):** Suggests matches where laying the draw is statistically advantageous
- **Under 2.5 Goals:** Predicts low-scoring matches with odds analysis

- **AI Analysis:** OpenAI-powered detailed match analysis
- **Multi-Theme Support:** Professional theme system with custom designs
- **Real-Time Updates:** Hourly automated odds and match data refreshes
- **Responsive Design:** Works perfectly on desktop, tablet, and mobile

This manual will guide you through every step of installation, configuration, and usage.

⚙️ System Requirements

Minimum Requirements

Component	Requirement
WordPress	6.4 or later
PHP	8.2 or later
MySQL	5.7+ or MariaDB 10.2+
SSL/TLS	Required for API requests
Disk Space	500KB minimum

> Most modern WordPress hosting providers meet these requirements. If unsure,

contact your hosting provider.

📥 Installation Guide

Step-by-Step Installation

1 Download the Plugin

Download the SeedBetArt Ai Bot plugin folder to your computer.

2 Upload to WordPress

Upload the plugin folder to `/wp-content/plugins/` on your WordPress server using FTP or your hosting control panel.

3 Activate Plugin

Go to WordPress Admin → Plugins and click "Activate" next to "SeedBetArt Ai Bot"

4 See Success Message

You should see a green notice: **"✓ SeedBetArt Ai Bot activated successfully!"**

Database tables are automatically created during activation.

> The plugin creates all necessary database tables automatically. No manual database setup is required.

🔑 API Setup & Validation

SeedBetArt Ai Bot requires three external APIs to function properly. This section guides you through obtaining and validating each API key.

1. Odds-API.io (Required)

Purpose

Provides current betting odds and match data from multiple sportsbooks

Setup Steps

1. Visit **https://www.odds-api.io/**

2.Click "Sign Up" and create a free account

3.Go to your dashboard and find your API Key

4.Copy the API key (it starts with a long alphanumeric string)

Pricing

•Free: 100 requests/month (limited testing)

•Paid plans available for production use

2. API-Football.com (Required)

Purpose

Provides team information, match statistics, and team badges

Setup Steps

1. Visit **https://www.api-football.com/**

2.Sign up for a free account

3.Navigate to your dashboard

4.Copy your API Key

Pricing

•Free: 100 requests/day

•Sufficient for most users

3. OpenAI API (Optional)

Purpose

Enables AI-powered match analysis and betting recommendations

Setup Steps

1. Visit **https://platform.openai.com/**

2.Create an OpenAI account or sign in

3.Go to API Keys section

4.Click "Create new secret key"

5.Copy and save the key securely

Pricing

•Usage-based pricing

•Recommended: Start with GPT-4o or GPT-4o-mini for cost efficiency

Validating API Keys in WordPress

1 **Navigate to Settings**

In WordPress Admin: SeedBetArt Ai Bot → ⚙️ Settings

2 **Enter API Keys**

Paste each API key into its corresponding field (Odds-API, Football-API, OpenAI API)

3 **Click Validate Buttons**

Click the ✓ **Validate** button next to each API key

4 Check Results

- **Green ✓ button:** API key is valid and working
- **Red ✗ button:** Shows specific error message explaining the issue

Common Validation Errors

Error Message	Solution
"Invalid API key"	Double-check the key copied from the provider. Ensure no extra spaces.
"Rate limit exceeded"	Upgrade your API plan or wait for the limit to reset.
"Connection timeout"	Check your internet connection. Verify your server has HTTPS enabled.
"Unauthorized"	The API key may have been revoked. Generate a new one from the provider.

> Do not share your API keys. Treat them like passwords. Anyone with your keys can use your API quotas and incur costs.

🎨 Theme Selection & Customization

SeedBetArt Ai Bot includes a flexible multi-theme system allowing you to customize the plugin's appearance.

Available Themes

🔵 **Basic Theme**

Color Scheme: Blue-Purple Gradient

Primary: #667eea

Secondary: #764ba2

Best For: Standard professional appearance

Quiet Thoughts

Color Scheme: Purple-Teal-Gold

Primary: #8b5cf6

Secondary: #14b8a6

Best For: Premium, elegant appearance

How to Change Your Theme

1 **Open Themes Menu**

In WordPress Admin: SeedBetArt Ai Bot → 🎨 Themes

2 **Browse Themes**

View theme cards showing colors and descriptions

3 **Click "Apply Theme"**

Select your preferred theme by clicking its "Apply Theme" button

4 **Instant Application**

The page reloads automatically with the new theme applied

All admin and frontend elements now use the new theme colors

> Theme changes apply immediately. No page rebuilding or cache clearing required.

📝 Using Shortcodes

Shortcodes allow you to display betting recommendations on any WordPress page or post.

Add these shortcodes directly in the page/post editor.

Available Shortcodes

1. Value Bets

```
[bsp_v2_value_bets]
```

Purpose: Displays matches with positive expected value (EV)

Shows: Match details, odds, EV percentage, confidence score

Best For: Highlighting profitable betting opportunities

2. Lay The Draw (LTD)

```
[bsp_v2_ltd]
```

Purpose: Displays matches where laying the draw is advantageous

Shows: Match, draw probability, recommended odds

Best For: Advanced betting strategies

3. Under 2.5 Goals

```
[bsp_v2_under25]
```

Purpose: Displays low-scoring match predictions

Shows: Match details, expected goals, confidence

Best For: Conservative betting approach

4. AI Analysis

```
[bsp_v2_ai_analysis sport="football" league="Premier League"]
```

Purpose: Displays AI-powered match analysis

Requires: OpenAI API key configured

Shows: Detailed AI-generated match analysis and recommendations

How to Add Shortcodes to Your Site

1 **Create or Edit Page**

Go to WordPress Pages or Posts and create a new page or edit existing one

2 **Open Block Editor**

Click in the editor area where you want the recommendations to appear

3 **Add Shortcode Block**

Add a "Shortcode" block (or paste the shortcode directly in the editor)

4 **Paste Shortcode**

Copy one of the shortcodes above and paste it into the block

5 Publish

Save and publish the page. The recommendations will display automatically.

> Shortcodes automatically validate that all APIs are configured before displaying. If an API is not validated, users will see a helpful error message.

📦 Managing Widgets

Widgets allow you to display betting recommendations in sidebar widget areas. They offer more customization options than shortcodes.

Available Widgets

💰 Value Bets Widget

Purpose: Display value betting opportunities in sidebars

Features:

- Configurable number of bets shown
- Display style options (List, Cards, Compact)
- Toggle confidence scores and EV display
- Auto-refresh capability

🎯 Lay The Draw Widget

Purpose: Show LTD recommendations in sidebars

Features:

- Adjustable number of recommendations
- Optional draw probability display
- Theme-aware styling

⚽ Under 2.5 Goals Widget

Purpose: Display Under 2.5 predictions

Features:

- Configurable item count
- Show/hide expected goals (xG)
- Confidence score display

Adding Widgets to Your Site

1 **Go to Widgets Page**

WordPress Admin → Appearance → Widgets

2 **Find Widget**

Look for "SeedBetArt Ai Bot" widgets in the available widgets list

3 **Drag to Widget Area**

Drag the widget to your desired sidebar or widget area

4 **Configure Options**

Set the widget title, number of items, display style, etc.

5 **Save Changes**

Click "Save" - your widget is now active on your site

Widget Interactive Features

All SeedBetArt Ai Bot widgets include these interactive features:

- **Sortable Columns:** Click column headers to sort by different fields
- **Live Search:** Real-time filtering of displayed data
- **Export to CSV:** Download widget data as spreadsheet
- **Auto-Refresh:** Configurable automatic updates
- **Responsive:** Adapts to all screen sizes

📊 Dashboard Overview

The SeedBetArt Ai Bot dashboard provides real-time statistics, charts, and administrative controls.

Dashboard Components

1. Stat Cards

Four main stat cards display:

- 💰 **Value Bets:** Count of available value betting opportunities

- 🎯 **LTD:** Number of Lay The Draw recommendations
- ⚽ **Under 2.5:** Count of under 2.5 goal predictions
- ⏰ **Last Updated:** Timestamp of last data refresh

2. Interactive Charts

Real-time visualizations show:

- **EV Distribution Chart:** Bar chart of bets by EV ranges
- **Bets by Type Chart:** Doughnut chart showing breakdown of recommendation types
- Charts update automatically and use your active theme colors

3. Recent Bets Table

Shows latest 10 recommendations with:

- Match details and teams
- Odds and EV information
- Confidence scores
- Sortable columns and live search

4. API Usage Monitor

Displays your API usage with:

- Daily/monthly call counts
- Token usage (for OpenAI)
- Percentage of quota used
- Warnings when approaching limits

Dashboard Menu Items

Menu Item	Purpose
📊 Dashboard	Main dashboard with statistics and charts
⚙️ Settings	Configure API keys and preferences
📋 Activity Log	View debug logs and system events
🎯 Search Params	Adjust betting algorithm parameters
🗄️ Database	Manage plugin data and tables
🎨 Themes	Select and manage themes

⚡ Advanced Features

OpenAI Model Selection

Choose which OpenAI model to use for AI analysis based on your needs:

Model	Cost per 1K Tokens	Recommended For
GPT-5	$0.15	Best quality analysis
GPT-4o	$0.015	Best balance (Recommended)
GPT-4o-mini	$0.00015	Most economical (Default)

GPT-3.5 Turbo	$0.0005	Fastest responses

> Start with GPT-4o-mini to minimize costs while testing. Upgrade to GPT-4o once you're satisfied with results.

API Usage Limits

Configure maximum API usage to control costs:

- **Odds-API Limit:** Set maximum calls per day
- **Football-API Limit:** Set maximum calls per day
- **OpenAI Token Limit:** Set maximum tokens per month

When a limit is reached, the plugin will:

- Stop making API calls to that service
- Show a friendly error message
- Wait for the limit to reset before resuming

Search Parameters

Fine-tune the betting algorithm with 12+ adjustable parameters:

- Minimum EV threshold
- Confidence score filters
- League filters
- And more...

Go to SeedBetArt Ai Bot → 🎯 Search Params to adjust these settings.

Dark Mode Support

SeedBetArt Ai Bot automatically detects your system's dark mode preference and applies the appropriate theme automatically.

- **Automatic:** System preference is detected and used
- **Manual:** Toggle dark mode on/off in dashboard
- **All Elements:** All admin and frontend components respect dark mode

Database Management

Go to SeedBetArt Ai Bot → 🗄️ Database to:

- View database table statistics
- Clear old cached data
- Optimize database performance
- Export data

🔧 Troubleshooting

Shortcodes Not Displaying Data

Problem

> Shortcodes appear but show an error message like "APIs not validated"

Solution

1. Go to SeedBetArt Ai Bot → ⚙️ Settings
2. Verify all API keys are entered correctly
3. Click the ✓ Validate button for each API
4. Ensure all three APIs show green validation status
5. Check Activity Log for specific error messages

Widgets Not Showing

Problem

Widget displays as empty or with loading spinner that never completes

Solution

1. Clear your browser cache (Ctrl+F5 or Cmd+Shift+R)
2. Check browser console for JavaScript errors (F12)

3.Verify all APIs are validated in Settings

4.Try disabling other plugins temporarily to check for conflicts

5.View Activity Log for error details

Theme Not Applying

Problem

Selected theme doesn't appear after clicking "Apply Theme"

Solution

1.Clear browser cache (Ctrl+F5)

2.Try applying theme again

3.Check if browser allows JavaScript (console should show [BSP V2 Admin] logs)

4.Try different theme

5.Check Activity Log for theme switch events

API Validation Errors

Problem

API validation returns specific error messages

Common Errors & Solutions

Error	Fix
"Invalid API key"	Copy key again carefully, check for extra spaces
"Rate limit exceeded"	Upgrade API plan or wait for daily reset
"Network error"	Check internet, verify HTTPS is enabled on server
"Service unavailable"	API provider may be down. Try again later.

Slow Performance

Problem

Dashboard or shortcodes load slowly

Solution

1.Check API response times (visible in Activity Log)

> 2.Increase cache TTLs in plugin settings

> 3.Reduce number of items displayed in widgets/shortcodes

> 4.Check WordPress admin performance (Ctrl+Shift+K console)

> 5.Consider using a caching plugin for WordPress

Accessing Activity Log

For detailed error information:

1. Go to SeedBetArt Ai Bot → 📋 Activity Log
2. View all system events and error messages
3. Or check log files in plugin's `/logs/` directory

❓ Frequently Asked Questions

Q: Do I need all three APIs to use the plugin?

A: Odds-API and Football-API are required. OpenAI is optional but needed for AI analysis features. Without OpenAI, you still get value bets, LTD, and Under 2.5 predictions.

Q: How often is data updated?

A: Odds are updated hourly via automated cron jobs. Match data updates similarly. You

can manually refresh from the dashboard.

Q: Can I use multiple themes?

A: Yes, but only one theme is active at a time. You can switch themes anytime from SeedBetArt Ai Bot → 🎨 Themes.

Q: What are "Value Bets"?

A: Value bets are matches where the odds offered are higher than the calculated probability of that outcome. They represent positive expected value opportunities.

Q: How much does it cost to use the APIs?

A: Odds-API and Football-API have free tiers. OpenAI uses a pay-as-you-go model based on tokens used. Check each provider's pricing page for details.

Q: Can I customize the theme colors?

A: The plugin includes two pre-built themes. You can create custom themes by editing CSS files in `/assets/themes/` directory.

Q: Is my API key secure?

A: Yes. API keys are stored in WordPress database and sanitized on input. Never share them. Treat them like passwords.

Q: What happens if I hit my API limit?

A: The plugin stops making calls to that API and shows a friendly message. Data won't

display until the limit resets or you increase your quota.

Q: Can I display recommendations on multiple pages?

A: Yes! Use shortcodes on any page/post or add widgets to multiple sidebar areas.

Q: Is there mobile support?

A: Yes, the plugin is fully responsive and works on desktop, tablet, and mobile devices.

Q: Can I export betting data?

A: Yes, all widgets include a "Export to CSV" button for downloading data as a spreadsheet.

Q: What if I encounter a bug?

A: Check the Activity Log for error details. Enable debug mode in Settings. Consult the Troubleshooting section or contact support.

🤝 Support & Resources

Getting Help

> ### Activity Log

> First line of troubleshooting. Go to SeedBetArt Ai Bot → 📋 Activity Log to view

> detailed system events and errors.

Debug Mode

> Enable in Settings to get verbose logging for advanced troubleshooting.

API Documentation

- **Odds-API:** https://www.odds-api.io/
- **API-Football:** https://www.api-football.com/
- **OpenAI:** https://platform.openai.com/docs/

Plugin Resources

- **GitHub:** https://github.com/lpanzieri/BettingSignalsPlus
- **This Manual:** Available in your Documentation folder

Requirements Checklist

Before reporting issues, verify:

- ☐ WordPress 6.4 or later installed
- ☐ PHP 8.2 or later
- ☐ MySQL 5.7+ or MariaDB 10.2+
- ☐ HTTPS/SSL enabled
- ☐ All three API keys obtained and validated

- ☐ Browser cache cleared
- ☐ No conflicting plugins

Tips for Success

- Start with GPT-4o-mini model for cost efficiency
- Monitor your API usage regularly
- Set appropriate API call limits for your budget
- Use Activity Log regularly to monitor system health
- Keep plugin updated for bug fixes and features
- Review search parameters regularly for optimal results

> Bookmark the Activity Log page for quick troubleshooting. It shows exactly what's
> happening behind the scenes.
